Backend engineer with expert Python: I design, build, and operate production systems — high-availability FastAPI APIs, PostgreSQL, Docker, and CI/CD on GCP and Azure — for brands like BBVA, Iberia, Decathlon, and KFC. Product mindset from idea to production: testing discipline, observability, and root-cause debugging of production issues. I also build production AI systems (LLM agents, RAG) and work daily with AI-native tooling (Claude Code, 10 Anthropic certifications). Versatile, proactive, and a fast learner, with remote-team experience.
